Experience

BacBon Limited | Frontend Engineer

Dhaka | September 2023 - Current

- Developed and maintained responsive web applications using React Js to deliver optimal user experiences across all devices.
- Collaborated with designers and backend engineers to implement intuitive UI/UX designs and seamless API integrations ensuring project delivery.
- Optimized web performance by employing best practices for code efficiency, browser compatibility, and page load speed, resulting in improved user engagement.
- Utilized version controlling system (Git).

Projects

Learning Management System (LMS)

November 2023 - June 2024

- **Admin Panel:** Teachers/Moderators set up exams, provide learning materials, and evaluate student assessments.
- **Student Access:** Learners access learning materials, participate in exams, and track their progress.
- **Integrated System:** Facilitates seamless interaction between teachers and students for effective learning and assessment management.

Check Me

July 2024 - September 2024

- **Three Panels:** Includes School, Teacher, and Student panels for comprehensive management.
- **Textbook Provision:** Schools supply textbooks; Teachers create assessments based on these textbooks and skills.
- **Student Engagement:** Students participate in assessments and track their progress, supported by the system used across 10,000 schools in Japan.

Customer Relationship Management (CRM)

August 2024 - Present

- **CRM Development:** Designing and developing a CRM system to optimize client interactions and streamline sales processes
- **Enhanced Strategies:** Implementing features to improve sales and marketing strategies and boost customer support.
- **Data Integration:** Centralizing data to facilitate better decision-making and effective relationship management.
